

FOURTEENTH CONGRESS OF THE)
REPUBLIC OF THE PHILIPPINES)
First Regular Session)

7 JUL -5 19:11

SENATE

RECEIVED BY: 

S. No. 1190

INTRODUCED BY THE HONORABLE MAR ROXAS

EXPLANATORY NOTE

This bill seeks to establish a system that will allow government agencies and offices involved in the formulation of economic policies, namely the National Economic Development Authority (NEDA), Bangko Sentral ng Pilipinas (BSP) and the Committees on Economic Affairs of the Senate and the House of Representatives, to convene quarterly and assess the impact of policy initiatives on economic, financial and social indicators.

NEDA, through the National Statistical Coordination Board (NSCB), releases updates on the National Income Accounts on a quarterly basis. Alternatively, BSP, as the central monetary authority of the country, also prepares data and conducts economic research for the guidance of the Monetary Board in the formulation and implementation of its policies. These statistics are an important input to both the private sector and government because these are used as basis for the formulation of business decisions and policy directions. Hence, more than a mere presentation of the performance of the economy, the fundamental objective of the "Economic Coordination Act" is to provide a framework for policy formulation by government to attain economic sustainability.

Under the proposed "Economic Coordination Act," NEDA and BSP will report to the Joint Economic Committee, at the end of every quarter, the basic state of the economy and relate this to the objectives, plans, and goals set forth by the Development Budget Coordination Committee (DBCC), the General Appropriations Act, and other developmental plans of the government. These presentations are expected to consist of statistics and the economic impact of policy decisions on these indicators.

By providing a coordinated feedback mechanism on a periodic basis, it is expected that government will be better able to address economic issues and set achievable targets that are well-supported by data and research.

In view of the foregoing, approval of this bill is earnestly requested.

M A R ROXAS
