S. No. 2412

EXPLANATORY NOTE

The government has always valued the role of education in nation building. In fact, the education sector always gets the largest share in the annual appropriations of the national government.

One of the many legislations which broadens access to education is RA 6728, as amended by RA 8545, which provides government assistance to *students and teachers in the private education in the form of supplements in their tuition fees*.

The existing law, however, has limited both the amount of assistance to be extended to deserving college students as well as the course to be covered by the scholarship program by only including the so-called "priority course program" to be determined by the concerned agencies of the government.

This proposed legislation seeks to address the said restriction by means of providing the college students beneficiaries with a higher amount of scholarship assistance from half to full coverage of the tuition fee. This bill likewise encourages college students to take up any technical course or college degree of their choice other than those identified by the government under its priority program.

Realizing that the limitations set forth in the existing Government Assistance Student Education Act are primarily due to the government's limited resources, this proposed piece of legislation will authorize the government to accept financial support from private donors with the hope of accumulating enough funding to fully support student grantees under this program.

Considering the urgency to provide assistance to the country's impoverished but well deserving students, immediate approval of this bill is earnestly sought.
