

THIRTEENTH CONGRESS OF THE REPUBLIC)
OF THE PHILIPPINES)
Third Regular Session)

6 FEB -7 2011

SENATE
S. B. No. **2557**

RECEIVED BY: 

Introduced by Senator Miriam Defensor Santiago

EXPLANATORY NOTE

Visually impaired seniors are more prone to falls, burns, bouts of depression and are more likely to need assistance with activities of daily living. Subsequently, they are more likely to become reliant on personal care services and costly medical services. By intervening in a timely fashion and linking the senior to appropriate services, the State can assist in maintaining the senior citizens' health and welfare as well as quality of life.

This bill seeks to establish a Senior Vision Services program which would provide comprehensive services to elderly persons who suffer from functional visual impairments. The services would include client assessment, information and referral for health care services, client and family counseling and education, and technical assistance for human services agencies without experience serving the blind or visually impaired. Elderly persons would be eligible for services if they suffered from a visual impairment that substantially interfered with their ability to perform routine daily tasks, even if they were not regarded as "legally blind."
