

Introduced by Senator Miriam Defensor Santiago

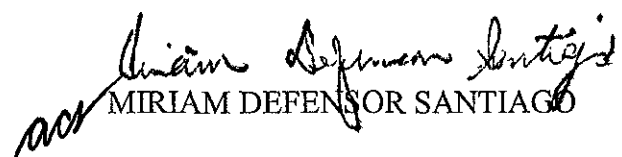

EXPLANATORY NOTE

The Constitution, Article 15, Section 1, provides:

The State recognizes the Filipino family as the foundation of the nation. Accordingly, it shall strengthen its solidarity and actively promote its total development.

Fundamental changes in the demographics and economics of family life in the country over the past 20 years have had a profound effect on children and their parents. As the number of women working outside the home and the number of two-earner families have been steadily increasing, there is a need to support community-based family resource and support programs that promote healthy child development and increase parental competency. Investment in promoting the development of family resource and support programs will reap long-term benefits for individual families and the nation as a whole.

Hence, this bill seeks to establish a national center for information and technical assistance relating to all types of family resource and support programs.
