**EXPLANATORY NOTE**

Industrialization is a key to a nation's progress but is not only limited to business enterprises and factories but also to agriculture. Our country, though primarily an agricultural-based economy, is still left behind in terms of production due to lack of modern farm equipment that other agricultural countries have been already using.

The experience of countries that have agriculturally-based economies flourished through planning on a concurrent industrial development program. The strategy has paid-off and catapulted countries like Taiwan, Korea and Japan into the First World.

A comprehensive program that can introduce mechanized farming to boost production is imperative. Through the Farm Machinery Manufacturing Program this idea could be achieved. With this, local manufacturers will be encouraged to enter into a joint venture with foreign companies that will assist and train them, with the view of enabling them to maximize the utilization of local materials in the products.

In view of the foregoing, this bill is earnestly recommended.

2 conditions for their continued participation.

3 Approved participants shall be issued a Certificate of Registration by the BOI and shall  
4 not comply with the terms and conditions provided with the Contract.

5 The Certificate of Registration shall contain the commitments made by the proponents in  
6 their proposals.

7  
8 **SEC 5.** Farm machinery models and variants shall be registered and approved by the BOI  
9 prior to its manufacture.

10 The following criteria shall be considered in defining a model:

- 11 a) body configuration
- 12 b) engine family / size
- 13 c) drive line configuration

14 A change in any two of the criteria from the basic models shall constitute a new basic  
15 mode. A variant is delivered from the basic model but the change in any one of the  
16 criteria:

17 The number of basic models and variants that a participant may have shall be maximum  
18 of three (3) basic models and two (2) variants for each models unless otherwise decided  
19 by the BOI.

20 The basic models and variants shall be retained by the participants for over a maximum  
21 period of five (5) years in the Philippines, unless otherwise authorized by the BOI, taking  
22 into account the capability of the local components and parts manufacturing industry.

23  
24 **SEC. 6.** Increase use of local components over and above the prescribed local content  
25 percentages shall be encouraged by an incentive scheme.

1           **SEC. 7.** The BOI shall promulgate the rules and regulations necessary for the effective  
2 implementation of this Act.
