### EXPLANATORY NOTE

The State's policy to adopt an integrated and comprehensive approach to health development available to all Filipinos and the provision of free medical care to the underprivileged was effected with the enactment of Republic Act 7875 or the National Health Insurance Act of 1995. The program covers a sustainable and progressive social health insurance and affordable quality health care services readily accessible to all Filipinos. At the core of this program is the creation of the Philippine Health Insurance Corporation or more popularly known as PHILHEALTH in place of MEDICARE.

In the field of social health care, PHILHEALTH is one of the most distinctive achievements of our government.

As the country's premier state-run health insurer, PHILHEALTH sets the standards, rules and regulations necessary to ensure quality of care, appropriate utilization of services, fund viability, member satisfaction, and over-all accomplishment of the program objectives set forth under RA 7875.

It should be noted however, that the law specifically provides that accessibility to these health care services are accorded to all Filipinos where the underprivileged, sick, elderly, disabled, women and children are given the utmost priority. Househelpers or housemaids is one of those who are underprivileged, neglected and discriminated groups of the employed in society. And undeniably more prone to harm with their employers be it here or abroad.

Under present laws, only government and private employees or laborers are covered by PHILHEALTH insurance. This excludes househelpers which runs counter to the mandatory and compulsory coverage of all citizens of the Philippines in the program as required by RA 7875.

This proposed bill aims to uplift the standard of living of all house helpers and recognize them as a significant sector in the labor force by requiring their employers to provide them PHILHEALTH coverage.

In view of the foregoing, the immediate enactment of this proposed measure is earnestly sought.
