## The Philippines and Selected A SEAN Countries: Education Spending and Outcomes

# A t a Glance 

The Philippines is generally doing a good job in the basic education sector. The country's educational inputs, participation, education efficiency, and completion outcomes are competitive compared to other ASEAN countries', although there are still some areas the country should work on.

## Educational Inputs

- Philippine government spending for secondary education decreased from 1999 to 2004. In 2004, the Philippine government allotted only $3.2 \%$ of its gross domestic product (GDP) for education while Malaysia spent more than double.
- The Philippines lags behind some of the ASEAN countries when it comes to per capita spending. In 2004, the National Government spent $11.1 \%$ of

Table 1. Educational Inputs

GDP per capita for every elementary student. Likewise, it spent $9.2 \%$ of GDP per capita for every high school student in the same year.

- Among ASEAN countries, the Philippines has the second largest pupil-teacher ratio at the primary school level at 35 students per teacher, next to Cambodia.

## Participation in Education

Table 2. Participation in Education

| Country | Gross enrollment ratio |  |  |  | Children out of school |  |
| :--- | ---: | ---: | ---: | ---: | ---: | :---: |
|  | \% relevant age group |  |  | primary-school-age <br> children <br> (in thousands) |  |  |
|  | Preprimary | Primary | Secondary | Male | Female |  |
|  | $\mathbf{2 0 0 4}$ | $\mathbf{2 0 0 4}$ | $\mathbf{2 0 0 4}$ | $\mathbf{2 0 0 4}$ | $\mathbf{2 0 0 4}$ |  |
| Cambodia | 9 | 137 | 26 | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ |  |
| Indonesia | 22 | 116 | 62 | $\mathrm{n} / \mathrm{a}$ | 215 |  |
| Lao PDR | 8 | 116 | 46 | 50 | 68 |  |
| Malaysia | 99 | 93 | 70 | 113 | 107 |  |
| Myanmar | $\mathrm{n} / \mathrm{a}$ | 93 | 38 | 408 | 374 |  |
| Philippines | 39 | 113 | 84 | 385 | 269 |  |
| Singapore | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ |  |
| Thailand | 92 | 99 | 77 | 365 | 433 |  |
| Vietnam | 47 | 98 | 73 | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ |  |

- Generally among ASEAN countries, there is a high number of out-of-school children. In fact, there are more male students than females who drop out.
- The Philippines has 385,000 male and 269,000 females who are out of primary and secondary school. The Philippines' total out of school youths is the third highest among ASEAN countries next to Myanmar and Thailand.
- Among ASEAN countries, the Philippines has the largest number of enrollees in the secondary level ( $84 \%$ ).

[^0]Table 3. Education Efficiency

| Country | Share of cohortreaching grade 5 |  |  |  | Repeaters in primary school |  | Transition to secondary education |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | \% of grade 1 students |  |  |  | \% of enrollment |  | \% of enrollmentin last year of primary |  |

## Education Efficiency

- In general, more male students in ASEAN countries fail to reach grade 5. Likewise, more male students repeat at least one grade level in primary school. On the other hand, more male primary school graduates enter secondary school.
- In the Philippines, female students stay longer in school than male students. In spite of this, the country is still lagging behind most ASEAN countries such as Vietnam and Malaysia when it comes to the number of female students reaching grade 5.
- Among ASEAN countries, the Philippines has the lowest proportion of repeaters in the primary school level at 3 for every 100 male students and 1 for every 100 female students.

Table 4. Education and Completion Outcomes

## Education and Completion Outcomes

- Among ASEAN countries, the Philippines has one of the highest percentage of primary school graduates at $98 \%$ in 2004, a remarkable increase from $86 \%$ in 1991. In 2002, the youth ( $15-24$ years old) and adult ( 15 years and older) literacy rates of the Filipinos are at par with other ASEAN countries. Ninety-four out of 100 male and 96 out of 100 female youths are considered literate. On the other hand, 93 out of 100 adults are considered literate.
